College Management Committee

- Collaborating with the student team to plan major College events.
- Representing fellow students' problems and interests and putting them forward in front of college authorities

PROJECTS

QuickSend — Visit Code

- Purpose: Full-stack bulk email system with file attachments for automated mass communication using Node.js and Gmail SMTP
- Handles 20-30 recipients with asynchronous processing and 2-second rate limiting to ensure 100% delivery success.
- Sends emails through SMTP, supporting app-specific passwords for secure email transmission.
- Target Users: Businesses requiring reliable bulk email campaigns with personalised content and attachments.
- Technologies Used: Node.js, Express.js, Nodemailer, Multer, JavaScript, HTML/CSS

Movie Search App — Visit Code

- Purpose: A responsive web application for searching and exploring movies with detailed information
- Implemented real-time movie search using TMDB/OMDB API integration
- Added favourites functionality with local storage for personalised user experience
- Built responsive UI with React components and modern CSS
- Technologies Used: React.js, JavaScript, REST APIs, Tailwind CSS

SKILLS

Programming Languages: C/C++, Python, JavaScript
Frameworks: Express js,React Js,Node js
Developer Tools: Github, VsCode
Coursework: Data Structures and Algorithms

ACHIEVEMENTS

LeetCode 50-Day Streak Badge: Successfully maintained a 50-day streak on LeetCode, solving diverse problems in data structures and algorithms.
